- Research collaborations incl. funding, consultancy and speaker honoraria
 - Pharma: Roche, Janssen, Bristol-Myers Squibb
 - MedTech/Data: Varian - Siemens, Philips, Sohard, Mirada Medical, IQVIA
 - Other: MD Anderson Cancer Center, Peter Munk Cardiac Center, Hanarth Fund, NovoNordisk Foundation, FNR Luxemburg
- Spin-offs and commercial ventures
 - Maastricht Innovations B.V.
 - Medical Data Works B.V.
 - Various patents on medical machine learning & Radiomics

Hoe goed zijn wij in uitkomsten voorspellen?

Longkanker
2 jaar overleving
158 patiënten
5 dokters
Prospectief
AUC: 0.56
2006

- Data delen is moeilijk (geen tijd, geen zin, mag niet, kan niet)
- Als data delen het probleem is, doe dat dan niet
- Als je de data niet naar het onderzoek kan brengen dan...
- moet je het onderzoek naar de data brengen
- Uitdagingen
 - De onderzoeksvraag moet gestuurd kunnen worden (treinen & spoor)
 - De data moet begrepen kunnen worden door een applicatie (en niet door een mens) -> FAIR data stations

Werkt dat? Interreg IV – euroCAT (2010)

Clinical details:
Pulmonary malignancy?

Report:
CT thorax and abdomen, arterial phase

Thorax:
Mass visible in the left upper lobe with a maximum size estimated at 8-46 of 4.7 x 3.0 cm. Possible involvement in mediastinum. Satellite nodes visible at 8-41 with an estimated size of 1.3 cm. Lymph node visible at station 7 with a size of circa 5,2 cm. No lymph nodes visible at contralateral side. Small consolidation middle lobe. No indication of atelectasis.

Abdomen:
Multiple sharply edged hypodens lesions visible which would initially match with cysts (HU 5). No relevant musculoskeletal findings

Conclusion:
Tumour with satellite nodes left upper lobe

AI bepaalt de huidige situatie -> Black box oké

AI algorithms cannot be expected to perform at a higher level than their training data, but should deliver the same standard of performance consistently for data within the training space.

Extreme vorm van federated learning

Standardised predictor	Subdistribution hazard ratio
male	2.12 (95% CI: 2.03 – 2.21)
age	1.80 (95% CI: 1.76 – 1.84)
wealth	0.96 (95% CI: 0.93 – 0.99)
education: low	1.04 (95% CI: 0.99 – 1.10)
education: high	0.90 (95% CI: 0.85 – 0.94)
